

Leading Custom Fabricator Adds Custom Assembly and Packaging to List of Capabilities

Hayward, Calif., May 19, 2004 - Pacific Die Cut Industries, the premier supplier of die cut and converted components for the life sciences market, announced today that it will be adding custom assembly and packaging to its list of value added services. Armed with a forty percent increase in production staff and a significant investment in capital equipment, Pacific Die Cut Industries is poised to take on more rigorous and demanding turn-key projects from medical OEMs and distributors. Its newly orchestrated assembly and packaging services can be customized to the specifications and requirements of each client. Pacific Die Cut Industries' is currently supplying an excess of 1,000,000 packaged units to the medical market, and has the excess capacity of tripling that volume in a short period of time. The ISO certified company's current list of capabilities includes die cutting soft, semi-soft and thin rigid materials, multi-layer laminating, narrow-width slitting and rapid design and prototyping.

Pacific Die Cut Industries is based in Hayward, California. For more information, please visit their website at <http://www.pacificdiecut.com>.
